Science Fables

The Butterfly Garden Clue

Story Quiz

This quiz follows Nora and Sam as they discover the four stages of a butterfly's life cycle.

1. Where did Nora first find the butterfly eggs?

A. Under a leaf
B. Inside a flower
C. On the ground
D. In a pond

2. What hatches from a butterfly egg?

A. A young butterfly
B. A caterpillar
C. A chrysalis
D. A beetle

3. What is the caterpillar's main job?

A. To fly and find flowers
B. To eat and grow
C. To lay eggs
D. To build a nest

4. What happens inside the chrysalis?

A. The caterpillar changes into an adult butterfly
B. The butterfly lays eggs
C. The caterpillar becomes a frog
D. The insect stops growing forever

5. Which order correctly shows the butterfly life cycle?

A. Egg → caterpillar → chrysalis → adult butterfly
B. Caterpillar → egg → butterfly → chrysalis
C. Egg → chrysalis → caterpillar → butterfly
D. Butterfly → caterpillar → egg → chrysalis

Answer Key

1. A — Under a leaf

Nora first found the butterfly eggs under a leaf.

2. B — A caterpillar

A caterpillar hatches from a butterfly egg.

3. B — To eat and grow

The caterpillar's main job is to eat and grow.

4. A — The caterpillar changes into an adult butterfly

Inside the chrysalis, the caterpillar changes into an adult butterfly.

5. A — Egg → caterpillar → chrysalis → adult butterfly

The butterfly life cycle goes: egg → caterpillar → chrysalis → adult butterfly.
