C. It helps them breathe underwater
D. It protects them from sunlight

5. Which animal would be best camouflaged in a snowy habitat?

A. A bright green frog
B. A white Arctic fox
C. A red ladybug
D. A black beetle

Answer Key

1. B — A way animals blend into their surroundings

Camouflage is a way animals blend into their surroundings.

2. B — Its color matched the green leaves

The green tree frog was hard to see because its color matched the green leaves.

3. B — It can help them hide from predators

Camouflage can help prey animals hide from predators.

4. A — It helps them approach prey without being noticed

Camouflage helps predators approach prey without being noticed.

5. B — A white Arctic fox

A white Arctic fox would be best camouflaged in a snowy habitat.
